

# Nu Concept Countertop & Kitchen Centre

## A Simple Guide to Measure Countertop Sizes

3-4-5 Method

### How to Measure

Select the layout(s) on the reverse side that most resembles your kitchen and/or bathrooms. Complete the following steps:

Step 1: Measure the existing countertop size or wall to wall if applicable then record on the appropriate diagram.

Step 2: Record the cabinet depth (front to back), excluding the door thickness

Step 3: Check the wall corners for square by using the ``3-4-5``method. Place a mark on the wall 3ft from the corner, on the adjacent wall, place a mark 4ft from the corner. A perfect 90° corner will measure exactly 5ft.

### How to Order

Step 1: Check corner square (as above) and record in appropriate box (if req`d)

Step 2: Indicate countertop “**End Finish**” for each counter on the corresponding diagram.

Step 3: Indicate the “**Build up**” option that will be required for the countertop

### How to order cont;

Step 4: Choose front profile and backsplash options.

Step 5: Confirm all measurements have been recorded on appropriate diagrams.

Step 6: Bring your info to a NuConcept designer for pricing.

### Product Information

#### Standard Sizes:

Vanity Depth 22.5”

Kitchen Countertop 25.5”

Bar Top (roll 2 sides) 12” & 27”

### End Finish

O – Open W – Wall

R – Range F – Fridge

Also indicate openings for range and fridge in counters
